COTTON:ON

Australia's most trusted safety partner.

From small businesses to enterprises, government agencies to community organisations, Duress devices can be customised to meet the unique safety needs of any industry.

DuressTM Falcon

Falcon Features

- Dimensions: Watch 57 × 43 × 15mm
- Weight: 74 grams
- Glass: Gorilla Glass 3
- Battery life 24 hours

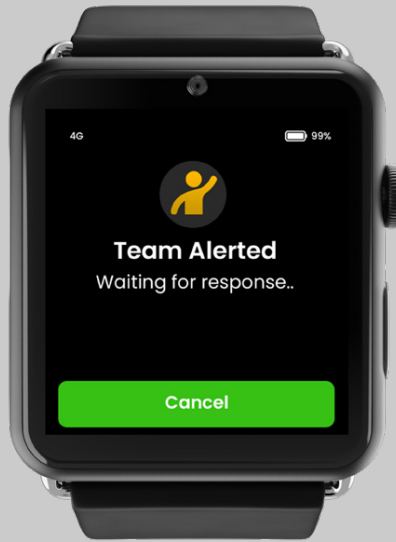

Emergency Monitoring

Request police with live video, audio and location.

Duress Falcon is the world's smallest body-worn camera. Click the action button to share live video, audio, and location. This alerts our operations centre and your managers. Live video verifies the emergency for a prioritised response. With location updating every 5 seconds, emergency services know exactly where to go.

Team Alert

Keep everyone in the loop with internal team notifications.

Duress Falcon gives your team the fastest way to request assistance. Hit the action button to send an alert to other team members, supervisors and managers. With live location built into the alerts, recipients can see where you are, even inside when used in conjunction with Duress Location Beacons.

Duress Comms

Stay connected when it matters most.

Duress Falcon features the brand new Duress Comms. You can speak to an individual team member or the entire team. Just say their name to connect instantly. You can query your company knowledge base and even activate emergency or team assist. With voice-to-text, your messages are delivered discreetly.

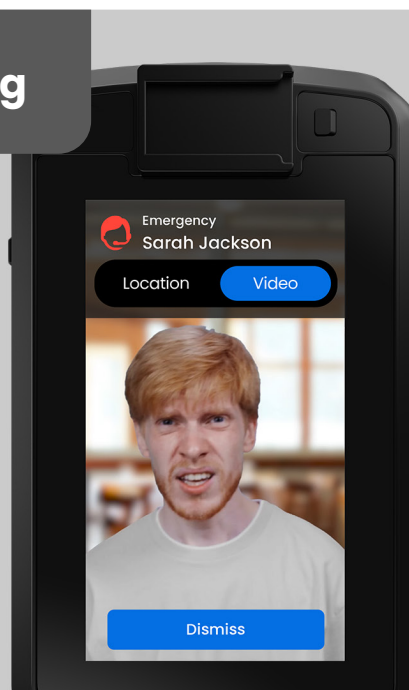

Duress Eagle™

Eagle Features

- Dimensions: 100 × 60mm × 23mm
- Weight: 130 grams
- Display: TFT 3.1 inch touch screen
- Battery life 7 days

Emergency Monitoring

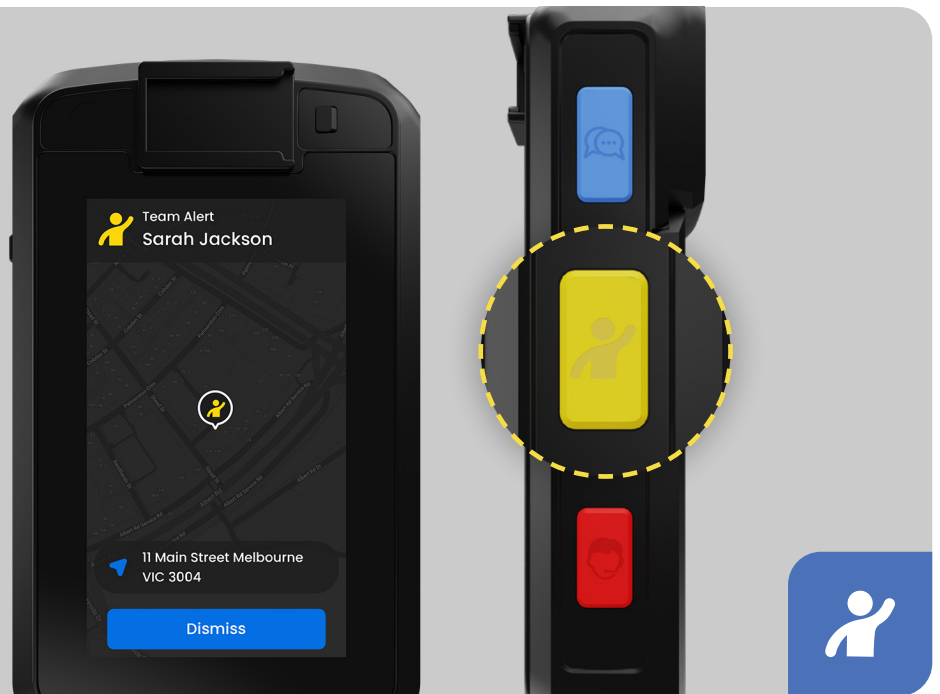

Request police with live video, audio and location.

Duress Eagle is more than a body-worn camera. Our safety device transforms team safety with emergency mode. Press the red button to share live video, audio, and location. This alerts our operations centre and notifies your managers instantly. With location updating every 5 seconds, emergency services know exactly where to go.

Team Alert

Keep everyone in the loop with internal team notifications.

Duress Eagle gives your team the fastest way to request assistance. Hit the yellow button to send an internal alert to team members, supervisors and managers. With live location built into the alerts, recipients can see where you are, even when inside when used in conjunction with Duress Location Beacons.

Duress Comms

Real-time chat from anywhere, to anyone.

Duress Eagle features the brand new Duress Comms. You can talk to another team member simply by saying their name. You can query your company knowledge base, policies and procedures, and even activate emergency or team assist. With voice-to-text, your messages are delivered discreetly.

Accessories

See our range of accessories that further tailor Duress devices to your needs. From clips and lanyard cases to charging docks, there is a solution for every team.

Duress Pathfinder

Your incident and compliance reporting platform.

Real-time monitoring and alerts

Access live data and real-time alerts from the portal, ensuring managers are always aware of their team's safety status.

Incident reporting and analytics

View detailed incident reports including video evidence. Analyse trends to improve safety protocols and response times across your organisation.

Manage users and teams

Effortlessly add, remove, and configure user settings, monitor team activity in real-time and ensure every worker stays protected—all from one centralised platform.

Comprehensive location tracking

When the device is activated, track the exact location of your employees at any given moment, ensuring they're safe and accounted for during their shifts.

Why customers love Duress™

10/10

Recommend to Healthcare Professionals

"Using the Duress system has given me more confidence to visit patients/clients in an outpatient setting, knowing that should an issue ever present itself, I have the best team behind me to intervene."
